EDUCATION

Sabancı University — Istanbul, Turkey
Bachelor of Engineering — Sep 2022 – Expected May 2026
Major in Computer Science

TED Ankara College High School — Ankara, Turkey
Full Scholarship; awarded based on national exam performance, ranking 1700th. — Sep 2018- May 2022

PROFESSIONAL EXPERIENCE

Independent AI & Digital Solutions Venture — Istanbul, Turkey
AI & Software Automation Engineer (Self-Employed) — May 2025 – Present

- Designed and deployed custom AI Agents using n8n to automate business tasks and data workflows for startups and small to medium enterprises.
- Developed and hosted responsive websites for diverse clients using HTML, Python and MySQL to increase their digital presence.
- Built personalized chatbots using LLMs as the "brain" to provide automated, accurate responses based on specific company data.

Internship, University of Groningen — Groningen, Netherlands
Cybersecurity and Machine Learning Intern — Jun 2025 – Aug 2025

- Built an intrusion detection pipeline using Random Forest and XGBoost on real-world cybersecurity data
- Developed a Docker-based environment and wrote a guideline to support future master's students in IDS research

Internship, Technical University of Munich — Munich, Germany
Observer Engineering Intern — Jan 2024 – Feb 2024

- Participated in team meetings and discussions to gain insights into project workflows

Internship, Inovako — Vitoria-Gasteiz, Spain
Deep Learning & Computer Vision Intern — Jul 2024 – Oct 2024

- Developed a machine learning module for computer vision tasks
- Deploying a web application to integrate the machine learning module

Assistant Project Manager, New York Business Excellence — New York, USA
Promoted from Intern — Jul 2024 – Sep 2024

- Managing multiple projects, ensuring timely delivery and goal satisfaction
- Giving strategic support to multiple teams

Internship, New York Business Excellence — New York, USA
AI Project Team Leader — Jun 2024 – Jul 2024

- Worked in a team of 4 as project leader and developed artificial intelligence project
- Delegated efficient workflow and reported the project in satisfaction of senior manager

RESEARCH EXPERIENCE & PUBLICATIONS

Research Assistant, University of Michigan — Michigan, USA
Cybersecurity and Machine Learning — Aug 2025 – Present

• Co-author of the paper "Revisiting Early Detection of Violating Mobile Apps: Dataset Validation and Feature Enrichment via VirusTotal and Quark Engine" (under revision at *Computers & Security*).
• Designed and implemented end-to-end ML pipelines for Android malware detection using XGBoost.

• Contributed to experiments on label reliability and model robustness.

ACTIVITIES AND LEADERSHIP

Sabancı Motor Racing Club Istanbul, Turkey
Co-President Dec 2022 – Present

- Organized multiple karting events for more than 40 students
- Organized and advertised Formula 1 watch parties for students

EIK Student Club Istanbul, Turkey
Active Member Sep 2022 – Present

- Established communications with companies to organize events

PROJECTS

Lung Cancer Detection Project Feb 2025

- Developed a computer vision module that detects lung cancer nodules using CT scans.
- Used deep learning models for the classification of the nodules.

Intrusion Detection System (IDS) with Machine Learning Project Jul 2025

- Designed and tested a pipeline to detect network attacks using Random Forest and XGBoost
- Built a Docker-based setup and documented the process in a student-facing guideline for reproducibility.

Secure P2P Client Application Project Jun 2025

- Added RSA-based enrollment and AES-CBC integrity-key exchange in a Tkinter GUI.
- Implemented an ECC/HMAC handshake for session-key derivation and mutual authentication.
- Created separate Message and Debug panes to log nonces, IVs, ciphertexts, and HMAC verifications

Crime and Socioeconomic Factors ML Project May 2025

- Analyzed the impact of education and unemployment on crime using EDA, hypothesis testing, and ML models
- Used Random Forest, Logistic Regression and KNN to classify crime levels and examined feature importance

OpenSMILE ML Project Apr 2023

- Worked with a team of 3 to develop a machine learning module using OpenSMILE
- Designed a system that can analyze which speakers are talking and what their emotional states are

Shopping Website Application Project Dec 2024

- Designed user interface, ensuring responsive experience using XAMPP
- Developed backend data structure with reliable form using phpMyAdmin

VOLUNTEER WORK

Civic Involvement Project Sep 2022 – Feb 2023

- City Planning

OTHER

- **Technical**: Advanced in C++, Advanced in Python, HTML/CSS, MySQL, Machine Learning, Computer Vision, Web Application, PyQt5, Django, phpMyAdmin, XAMPP, Socket Programming, Docker, Cisco Packet Tracer, Wireshark
- **Languages**: Fluent in English, Turkish; Conversational Proficiency in Spanish
